

I have no longer TTY cuz I always use my Sorenson VP or my computer ip-relay but I rather use VRS relay but it really takes long time to answer me back cuz I have the serious health problems and I have doctors I need to call or I need to call my pharmacy for my medications, etc. It is mostly important to me. I have no TTY. I can't wait much longer for VRS to answer me back so I have to use my computer IP-Relay which I do not like because it is kind of hard for me to talk or explain what i need to talk with my doctor. The VRS Relay is best and much easy for me to talk with my doctor. I have alot of health situations. My husband Warren is hearing but he works alot of hours and is not home much and works 7 days a week. I feel the Sorenson VRS is mostly important to me. I am alone in the house. If something happens to me, I need to call 911, VRS is the only one I can use but the VRS is long time waiting to answer me. Thanks so much.
